Dwarf Fruit Trees

LARGER FRUIT • EASY TO PICK • BEAR YOUNG

Inter-State is doing more basic research in the production of Dwarf Fruit Trees than any other nursery in America. These Dwarf Fruit Trees are becoming tremendously popular simply because their small size makes it possible for millions now to grow their own delicious home-grown fruit even if their yard is small. Orchardists are planting them because they bear younger, often just a year or two after planting, are easy to take care of, and the fruit is larger.

Dwarf Pear Trees

They grow scarcely taller than your head, except Bartlett is taller. Fruits are larger. Bear very young. Plant 2 varieties so they can cross-pollenate and thus produce more fruit. Plant 8 to 10 feet apart.

FA 7 Never has a new strawberry become so popular as quickly as Streamliner. The reasons are simply that it produces so heavily the big red berries of such fine flavor. **PLANTED THIS FALL IT WILL BEAR NEXT SPRING, SUMMER AND FALL.** The berries are Big, Red, Sweet and DELICIOUS. Self-pollenizing.

NEW, IMPROVED *Blueberries*

These 3 new, improved blueberries are far superior to common varieties. They have larger fruit, bear more profusely, better flavor and the bushes are so attractive you can plant them in your front yard with regular shrubs. The white flowers are lovely in the spring followed by the beautiful blue, luscious fruit. The waxy rich green foliage colors red in the fall. Wonderful for eating fresh, for pies and freezing. We sell only the three varieties together so they can cross pollinize. This is an all season collection of varieties that start ripening in late June continuing through early August. Plant in a cluster, 4 to 6 feet apart. Branched 3-year old plants, almost 2 feet tall that will bear next year after planting.

Blueberries prefer an acid soil. You can make your soil acid by mixing peat moss or a handful or two of common sulphur with your soil when planting.

Bridal Wreath Hedge

HANDSOME *Bridal Wreath*

FH 3 Bridal Wreath (*Spirea Van Houtte*)—This photograph shows the beauty of Bridal Wreath, America's most popular and widely planted untrimmed flowering hedge. Millions of small white blooms cover the gracefully arching branches, every spring, without fail. Requires no special care and lasts a lifetime. Perfectly hardy, grows everywhere, in full sun or partial shade. You see it all over America and everywhere it is attractive and thriving. Makes a marvelous hedge or screen 5 to 6 feet tall. Plant 2 to 3 feet apart.

AMAZING ROSA *Multiflora*

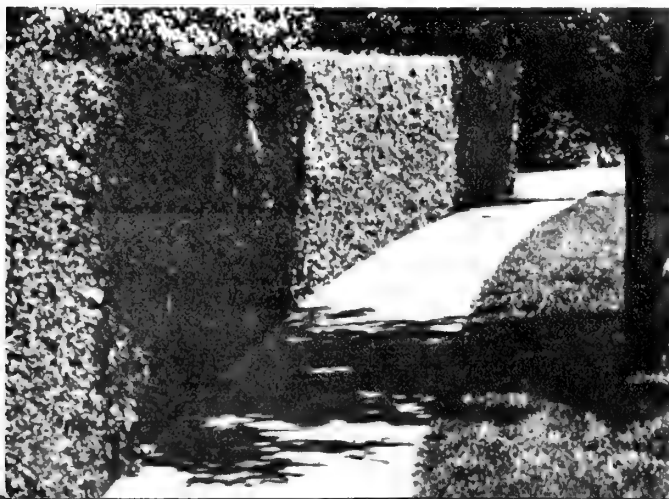

FH 7 Rosa Multiflora Japonica—The conservation people recommend this for a living hedge where you have plenty of room, for erosion control and an excellent wild life refuge. However, we do not advise using it on small city lots because when not trimmed it makes a bushy, thorny plant 6 to 8 feet tall and almost as wide. Has white flowers in spring followed by red fruits which the birds like. Hardy up to central Iowa. We have seen many fine untrimmed hedges on farms. Plant 18 to 24 inches apart.

Not only adds beauty, it also protects your yard especially if you have a corner lot. It is fine for a division line between yards. Can be trimmed to any desired height, making a thick, dense hedge, without thorns, right down to the ground. Requires trimming only twice during the summer. CHINESE ELM

FH 1 Chinese Elm—Is America's fastest growing hedge, making a good showing in just a few months. It is the first to leaf out in the spring and one of the last to shed in the fall. You can trim to any desired height from 3 to 10 feet, as a hedge or tall screen. The more you trim it the more dense and compact it becomes. We recommend that after planting, you cut off nearly all of the top, leaving only 5 to 6 inches above the ground. This will make a bushier, more dense hedge. Plant 8 inches apart.
